

Project Information

When will CHT T be improved?

- There are no current plans to make changes to the highway.
- Timing would be based on available funding (see below).
- An estimated timeframe would be sometime in the next 10 years.

How will the highway improvements be paid for?

- No funding has been identified at this point in time.
- Grant funding opportunities would be explored to cover up to 80% of the total project expense.

How much would the improvements cost?

- The total project is estimated to cost \$25-30 million dollars.
- Local jurisdictions would pay around \$5 million in local matching funds if an 80% grant can be secured.

The plans show houses and out buildings being removed. What is the process for those impacted by any removals?

- Owners would be compensated for any loss.
- Minimizing the impact on landowners is one reason this planning is being done now. It allows people time to plan around the possibility of future construction.
